

## BL.ID-N2/04 Single sided safety barrier

### PERFORMANCE PARAMETERS

Safety barrier suitable for ensuring a right performance in situations involving particularly dangerous obstacles and capable of meeting any traffic and road requirements. It is made of a single sided barrier and a post CPN 120x55x1500 every 2 m

### ADVANTAGES

Its low weight and simplicity make it easy to transport, handle, assemble and maintain, resulting in a significant reduction in costs. Direct transition with other safety barriers.

### MATERIALS

Steels as per EN 10025.

### DURABILITY

Hot Dip Galvanization as per EN ISO 1461.

Containment Level	N2
Severity Index	A
Working Width	W4
Dynamic Deflection	0,9

### CRASH TESTS (AS PER EN 1317)

**Test:** TB32 (car 1.500 Kg., 110 Km/h. 20°)  
**Code:** E08-4264  
**Date:** 10/12/2008  
**Laboratory:** CIDAUT (Valladolid – Spain)

**Test:** TB11 (car 900 Kg., 100 Km/h, 20°)  
**Code:** E08-4446  
**Date:** 12/12/2008  
**Laboratory:** CIDAUT (Valladolid – Spain)
