

BL.ID-N2/R3 Single sided safety barrier

PERFORMANCE PARAMETERS

Safety barrier suitable for ensuring a right performance in situations involving particularly dangerous obstacles and capable of meeting any traffic and road requirement.

ADVANTAGES

Its low weight and simplicity make it easy to transport, handle, assemble and maintain, resulting in a significant reduction in costs. Direct transition with other safety barriers.

MATERIALS

Steels as per EN 10025.

DURABILITY

Hot Dip Galvanization as per EN ISO 1461

Containment Level	N2
Severity Index	A
Working Width	W3
Dynamic Deflection (m)	0,8

CRASH TESTS (AS PER EN 1317)

Test: TB32 (car 1.500 Kg., 110 Km/h., 20°).
Code: E12-0091.
Laboratory: CIDAUT (Spain).

Test: TB11 (car 900 Kg., 100 Km/h., 20°).
Code: E12-0079.
Laboratory: CIDAUT (Spain).
