

## BLIDN2R4 Single sided safety barrier

### PERFORMANCE PARAMETERS

Safety barrier suitable for ensuring a right performance in situations involving particularly dangerous obstacles and capable of meeting any traffic and road requirement.

### ADVANTAGES

Its low weight and simplicity make it easy to transport, handle, assemble and maintain, resulting in a significant reduction in costs. Direct transition with other safety barriers.

### MATERIALS

Steels as per EN10025

### DURABILITY

Hot dip galvanization as per EN ISO 1461.

Containment Level	N2
Severity Index	A
Working Width	W4
Dynamic Deflection (m)	1,1

### CRASH TESTS (AS PER EN 1317)

Test: TB32 (car 1.500 Kg., 110 Km/h., 20°)

Test: TB11 (car 900 Kg., 100 Km/h., 20°)
